Abstract

Background ICG-001, an antagonist of CBP (CREB-binding protein), has been demonstrated to exert anti-tumor activity via the modulation of the Wnt signalling pathway. It has previously been demonstrated that miRNAs play an important role in ICG-001-mediated tumor suppression. In the present study, the role of miRNA-134 and β 1-integrin in ICG-001-mediated anti-tumor activity in nasopharyngeal carcinoma (NPC) was examined.

Methods NPC cell lines including C666-1, HONE-1 and HK-1 were used in this study. RT-PCR and Western blot were used to study the expression of miRNA-134 and the protein expression of the target proteins, respectively. Confocal microscopy was used to analyse the subcellular localization of β 1-integrin. In the functional studies, *in vitro* endothelial adhesion assay and *in vivo* nude mice model were used to evaluate the adhesion and migration of ICG-001-treated NPC cells in animals, respectively.

Results ICG-001 was found to up-regulate the expression of miRNA-134 and down-regulate β 1-integrin in NPC cells. The effect was accompanied with the inhibition of the adhesion of NPC cells to lung endothelial cells. In addition, over-expression of miRNA-134 would down-regulate the expression of β 1-integrin. Results from β 1-integrin 3'UTR Renilla luciferase reporter assay confirmed that β 1-integrin is a target of miRNA-134 in NPC cells. In the animal study, the ability of ICG-001-pretreated NPC cells or stable miRNA-134 expressing NPC cells to migrate to the mouse lung was greatly reduced.

Conclusion The CBP antagonist ICG-001 may further be developed as an anti-tumor agent for the treatment of nasopharyngeal carcinoma.

Table of Contents

DECLARATION	i
Abstract	ii
Acknowledgements	iii
Table of Contents.....	iv
List of Abbreviations	vii
Chapter 1 - Introduction.....	1
1.1 Nasopharyngeal Carcinoma (NPC)	1
1.1.1 Epidemiology	1
1.1.2 Histopathological classification of NPC	4
1.1.3 Etiology of NPC.....	5
1.1.4 Therapeutic treatment of NPC	7
1.2 ICG-001.....	8
1.2.1 Structure of ICG-001	8
1.2.2 Biological functions of ICG-001	8
1.3 MicroRNA	10
1.3.1 General Properties of microRNAs.....	10
1.3.2 Biogenesis of microRNAs.....	10
1.3.2 Functions of microRNA.....	11
1.4 Integrins	13
1.4.1 General properties of integrins	13
1.4.2 Functions of integrin	13

1.5 Aims of the study	15
Chapter 2 - Materials and Methods	16
2.1 ICG-001.....	16
2.2 Cell culture	16
2.3 Treatment of ICG-001 on Cells.....	17
2.4 Transfection with miRNA-134 precursor (pre-miRNA-134)	17
2.5 Stable expression of miRNA-134 using Lenti-virus infection system.....	18
2.6 Western blotting	20
2.7 3'UTR Luciferase Reporter Assay	21
2.8 RNA extraction.....	22
2.9 Quantitative Real-time PCR.....	23
2.10 Cell adhesion Assay	24
2.11 Confocal Microscopy.....	25
2.12 Adhesion of NPC to lung endothelial cells	25
2.13 Nude Mice Tumorigenicity Bioluminescence Assay	26
2.14 Statistics	26
Chapter 3 – Effect of ICG-001 on the migration and adhesion of NPC cells....	27
3.1 Introduction.....	27
3.2 Results.....	31
3.2.1 Effect of ICG-001 on the adhesion of NPC cells	31
3.2.2 <i>ICG-001 inhibits adhesion of NPC cells to lung endothelial cells</i>	31
3.2.2 Effect of ICG-001 on the expression of miRNA-134	32
3.2.3 ICG-001 down-regulated the expression of $\alpha 5$ and $\beta 1$ -integrin	32

3.2.4 Over-expression of miRNA-134 down-regulated β 1-integrin	33
3.2.5 β 1-intergrin is a direct target of miRNA-134	34
3.2.6 ICG-001 inhibited the expression of α 5 β 1-integrin and disrupted the actin network	35
3.3 Discussion.....	36
Chapter 4 – ICG-001 suppressed the metastasis of NPC in the nude mice	50
4.1 Introduction.....	50
4.2.1 Metastasis of ICG-001 treated NPC in mice after IV injection	53
4.2.2 Metastasis of NPC cells with stable over-expression of miRNA-134.....	53
4.2.3 Metastasis of NPC cells with transient over-expression of miRNA-134	54
4.3 Discussion.....	55
Conclusion.....	61
Future Perspectives	62
References	64
CURRICULUM VITAE.....	77
